Exp : 8 Configuring GRC / Risk Dashboards for Management Reporting

Aim

To review the Eramba GRC dashboard and use it to provide management-level visibility into tasks, risks, risk scores, and risk treatments.

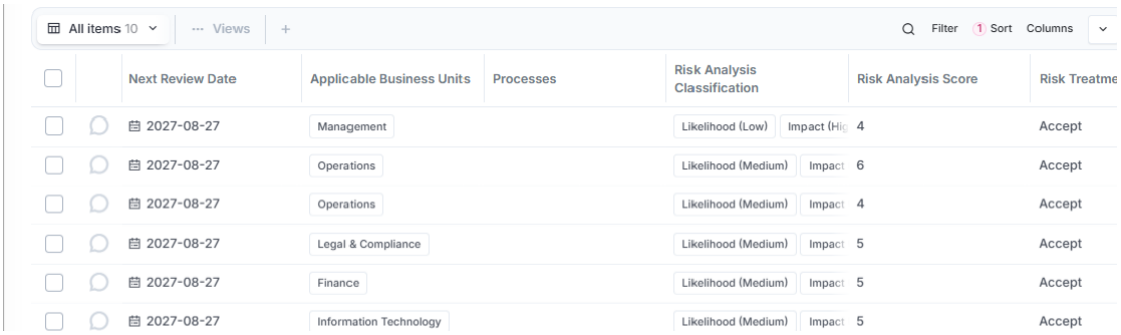

Procedure

1. Log in to the Eramba application.
2. Navigate to **Dashboard** from the left-side menu.
3. Review the available dashboard sections such as *Expired Tasks*, *Today Tasks*, and *Future Tasks*.
4. Review the *Asset Based Risks Matrix* section.
5. Navigate to **Risk Management → Business Risks**.
6. Review the list of configured business risks.
7. Verify the **Risk Analysis Score**, **Risk Analysis Classification**, and **Risk Treatment** for the listed risks.
8. Use the displayed information as a basis for management risk reporting.

Output

The GRC dashboard and Business Risks register provide a centralized view of GRC activities, risk scores, and risk treatments.

All items 10 | Views | + | Filter | 1 Sort | Columns

Next Review Date	Applicable Business Units	Processes	Risk Analysis Classification	Risk Analysis Score	Risk Treatme
2027-08-27	Management		Likelihood (Low) Impact (Hi	4	Accept
2027-08-27	Operations		Likelihood (Medium) Impact	6	Accept
2027-08-27	Operations		Likelihood (Medium) Impact	4	Accept
2027-08-27	Legal & Compliance		Likelihood (Medium) Impact	5	Accept
2027-08-27	Finance		Likelihood (Medium) Impact	5	Accept
2027-08-27	Information Technology		Likelihood (Medium) Impact	5	Accept

Result

The GRC dashboard was successfully accessed and reviewed for management reporting. Business risk information, including risk scores and treatments, was available for management review. The Asset Based Risks Matrix could not be displayed because of the current risk calculation configuration.
