Exp No:2 Introduction to SIEM

Aim

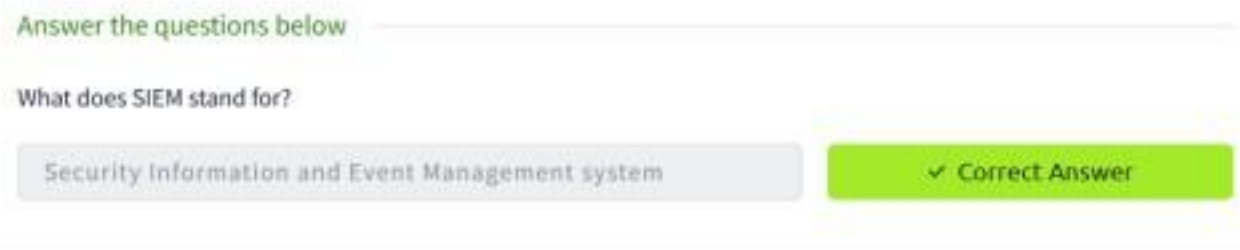

To understand the basic concepts and working of Security Information and Event Management (SIEM) using the TryHackMe Introduction to SIEM exercise.

Procedure

1. Log in to TryHackMe and open the **Introduction to SIEM** exercise.
2. Study the concepts of SIEM, logs, events, and security monitoring.
3. Explore the SIEM interface and analyze the given security logs.
4. Answer the questions provided in the tasks.
5. Verify the answers and complete the exercise.

Tasks

Task 1:

Task 2:

NAME : VEDANTH S ROLL NO : 231901060

Task 3:

Answer the questions below

Read the task above.

No answer needed ✓ Correct Answer

Task 4:

Answer the questions below

In which location within a Linux environment are HTTP logs stored?

/var/log/httpd ✓ Correct Answer

Task 5:

Which Event ID is generated when event logs are removed?

104 ✓ Correct Answer
