NAME : VEDANTH S ROLL NO : 231901060

Exp No :3 Creating a Risk Register

Aim

To create a Risk Register using Microsoft Excel for identifying, assessing, prioritizing, and managing organizational risks.

Procedure

1. Open Microsoft Excel and create a new workbook.
2. Create columns for Risk ID, Risk Description, Asset/Process, Likelihood, Impact, Risk Score, Risk Level, Controls, Treatment, Owner, and Status.
3. Enter sample organizational risks and their details.
4. Calculate the Risk Score = Likelihood × Impact.
5. Classify risks as Low, Medium, or High based on their score.
6. Add suitable risk treatments, owners, and status for each risk.

Output

Risk register

Risk Scoring guide

Risk Score	Risk Level	Action
1-7	Low	Monitor and manage through routine controls
8-14	Medium	Additional treatment or monitoring may be required
15-25	High	Priority treatment and management attention required

Result

A Risk Register was successfully created in Excel containing identified risks, risk scores, risk levels, existing controls, treatment plans, risk owners, and status.
