Exp 5 Implementing Controls & Compensating Control Attestation

Aim

To implement security controls in Eramba and verify their audit/attestation status.

Procedure

1. Go to **Control Catalog → Internal Controls**.
2. Create/import internal controls.
3. Select a control such as **Privileged Account Monitoring**.
4. Open **Edit → Audits**.
5. Set the audit date and select **Audit Owner** and **Audit Evidence Owner**.
6. Verify the audit methodology and success criteria.
7. Save the control.

Output

10 internal controls were created, and an audit/attestation plan was configured for **Privileged Account Monitoring**.
